**Re: Freeborn Wind Farm Site Permit Application**

To Whom It May Concern:

As you may be aware, Freeborn Wind Energy LLC is currently developing an up to 200 MW wind project called the Freeborn Wind Farm in Freeborn County, Minnesota and Worth County, Iowa. Freeborn Wind has submitted a Site Permit Application to the Minnesota Public Utilities Commission for construction of up to 84 megawatts (MW) of the Freeborn Wind Farm in Minnesota.

I am writing to request that you maintain a copy of the enclosed Site Permit Application so that it is available for public review. Electronic copies of the application are also available on the Minnesota Public Utilities Commission website at [www.puc.state.mn.us](http://www.puc.state.mn.us). Thank you for your assistance in providing this service.

Please feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Litchfield".

Dan Litchfield  
Senior Manager, Project Development
